

Bappi Datta

Full-stack Software Engineer with expertise in .NET, React, SQL Server

✉ bappi.sust@gmail.com ☎ +8801790444437 📍 Dhaka, Bangladesh

Profile

As a highly skilled full-stack developer with over 14 years of experience in software development, I have a strong foundation in technologies such as C#, ASP.Net Core, and SQL Server and experience in front-end development using JavaScript frameworks such as React. I have also worked with the Java and Spring framework, demonstrating my versatility and ability to adapt to different technologies. I am a proactive learner with a proven ability to quickly learn and implement new tools and techniques to achieve project goals.

In addition to my technical skills, I am proficient in agile methodologies and have served as a Scrum Master, leading teams through the development process and ensuring successful project delivery. I am committed to process excellence and have a track record of delivering projects on time and within budget across diverse business domains such as ERP and FinTech.

I have experience working on both onsite and remote development teams and am comfortable collaborating with colleagues and clients from a variety of locations.

I am seeking new opportunities to apply my skills and experience to challenging and rewarding projects and am excited to bring my expertise to dynamic organizations.

Professional Experience

Apr 2024 – Present
Florida, United States

Senior Software Engineer, *Ethos Risk Services*

- Utilizing ASP.NET Core, React, and SQL Server to design and implement innovative features that enhance the application.
- Continuously improving and optimizing existing features to ensure high performance and user satisfaction.
- Transitioning existing features from ASP.NET MVC and ASP.NET WebForms to modern frameworks like ASP.NET Core and React, ensuring seamless integration and improved functionality.
- Ensuring code quality and reliability by writing comprehensive unit tests using NUnit and performing integration tests with Selenium.
- Working closely with product owners, designers, and other developers to deliver high-quality software solutions.

Jan 2019 – Mar 2024
